
System Administrator Essentials Training

Starting in May 2014

SkillsProf Bonaire Technology Center

► **Training Summary**

The SkillsProf System Administrator Essentials training covers a variety of fundamental skills designed for ICT system administrators. The training is composed of 1 weekly lesson combined with home studies and labs within a time frame of 1 year.

Through combined training consisting of Classroom lessons and Study Groups, **SkillsProf provides** knowledge sharing opportunities with other ICT Professionals from various companies and organizations on Bonaire. Our training center is adequately equipped to supply you with both physical and remote access to a full infrastructure environment with all required functionality for optimum

learning experience. After successful completion of this training you will be given 3 highly desired and accredited ICT certifications in Networking Infrastructures, Server Infrastructures and E-mail Infrastructures (based on Microsoft Exchange).

► **System Administrator**

The normal costs involved with complete ICT Infrastructure tracks in a training based or boot-camp based environment would be extremely high and still require the administrator to do a lot of individual home study and travel abroad. The average success rate of students is around 50-60 percent. The materials can be overwhelming for the starting applicant and a lot of discipline is required to be successful in achieving the individual and/or completion of all modules.

SkillsProf delivers a unique training opportunity to achieve the entire 6 Network/System administrator track in one year timespan, using SkillsProf group based training and mentoring System/Network Infrastructure Administration track together with international partners.

Applicants will still have to do around 6 to 10 hours of home study per week, depending on the system administrators' prior content knowledge.

Duration

1 year: 1 day per week: 4 hours

Key learning Objectives

- System & Security administration tasks.
- Networking Infrastructures
- Server Infrastructures

► Test & Exam Preparations

There will be 6 Exams total involved in this program. Each will lead to individual and contribute to a collective certification. Before the exams are taken one or more additional training session may be scheduled for exam preparation purposes. Using the best test exams and materials available the risk of failing the exams are minimized. If the student is unable to pass the preliminary exams or meet the criteria at the training facility, it would be impractical to take the final exams. SkillsProf motivates applicants to participate in unison with the group which will make the possibility of achievement more likely.
